

ENGINEERED FOR HIGH-ABRASION PERFORMANCE

Filament

High-performance braided carrier rope designed for demanding paper machine applications.

1

Abrasion resistance

Engineered coating enhances the abrasion resistance of filament nylon.

2

Coated construction

Protective coating is engineered for demanding paper machine service.

3

Stable performance

Designed for consistent, long-lasting performance in carrier rope applications.

4

Standard sizing

Available in three standard diameters and three stock reel lengths.

MANUFACTURING SPECIFICATIONS

Filament – Coated construction

The abrasion resistance of 100% filament nylon is enhanced by an engineered coating.

STYLE	DIAMETER	APPROX. BREAK STRENGTH	STANDARD STOCK LENGTH
Filament Coated	3/8 in	4,000 lb	1000 ft, 2500 ft, 5000 ft
Filament Coated	7/16 in	5,000 lb	1000 ft, 2500 ft, 5000 ft
Filament Coated	1/2 in	5,500 lb	1000 ft, 2500 ft, 5000 ft

PRODUCT APPLICATION

Coated filament nylon combines high abrasion resistance with a straightforward, industry-proven carrier rope construction for paper machine applications.
